

RENTSPACE

PROPOSAL
PROJECT

EMMANUEL QUIJANO
MP1-PRESENTATION

WHY RENTSPACE

A growing number of people are finding it difficult to own a house of their own.

Thus looking for For-Rent spaces like apartments, house etc. are much more convenient for them..

Most FB post about Renting are random and within different group page which some does not have the luxury to browse for long.

RENTSPACE:

OBJECTIVES AND FEATURES

We come up with a website to help people conveniently look and post properties for rent.

To bridge the gap between Landlords and Rentee by this website it will be much faster to communicate and set appointments for viewing.

The website compiles fb post about renting to make it easier for renters to sort and look for their preferred house/apartment and the location they would like to live in.

It let other apartment owners to list their properties for rent.

Rentee can also list their details so landlords can easily find them.

TARGET USER

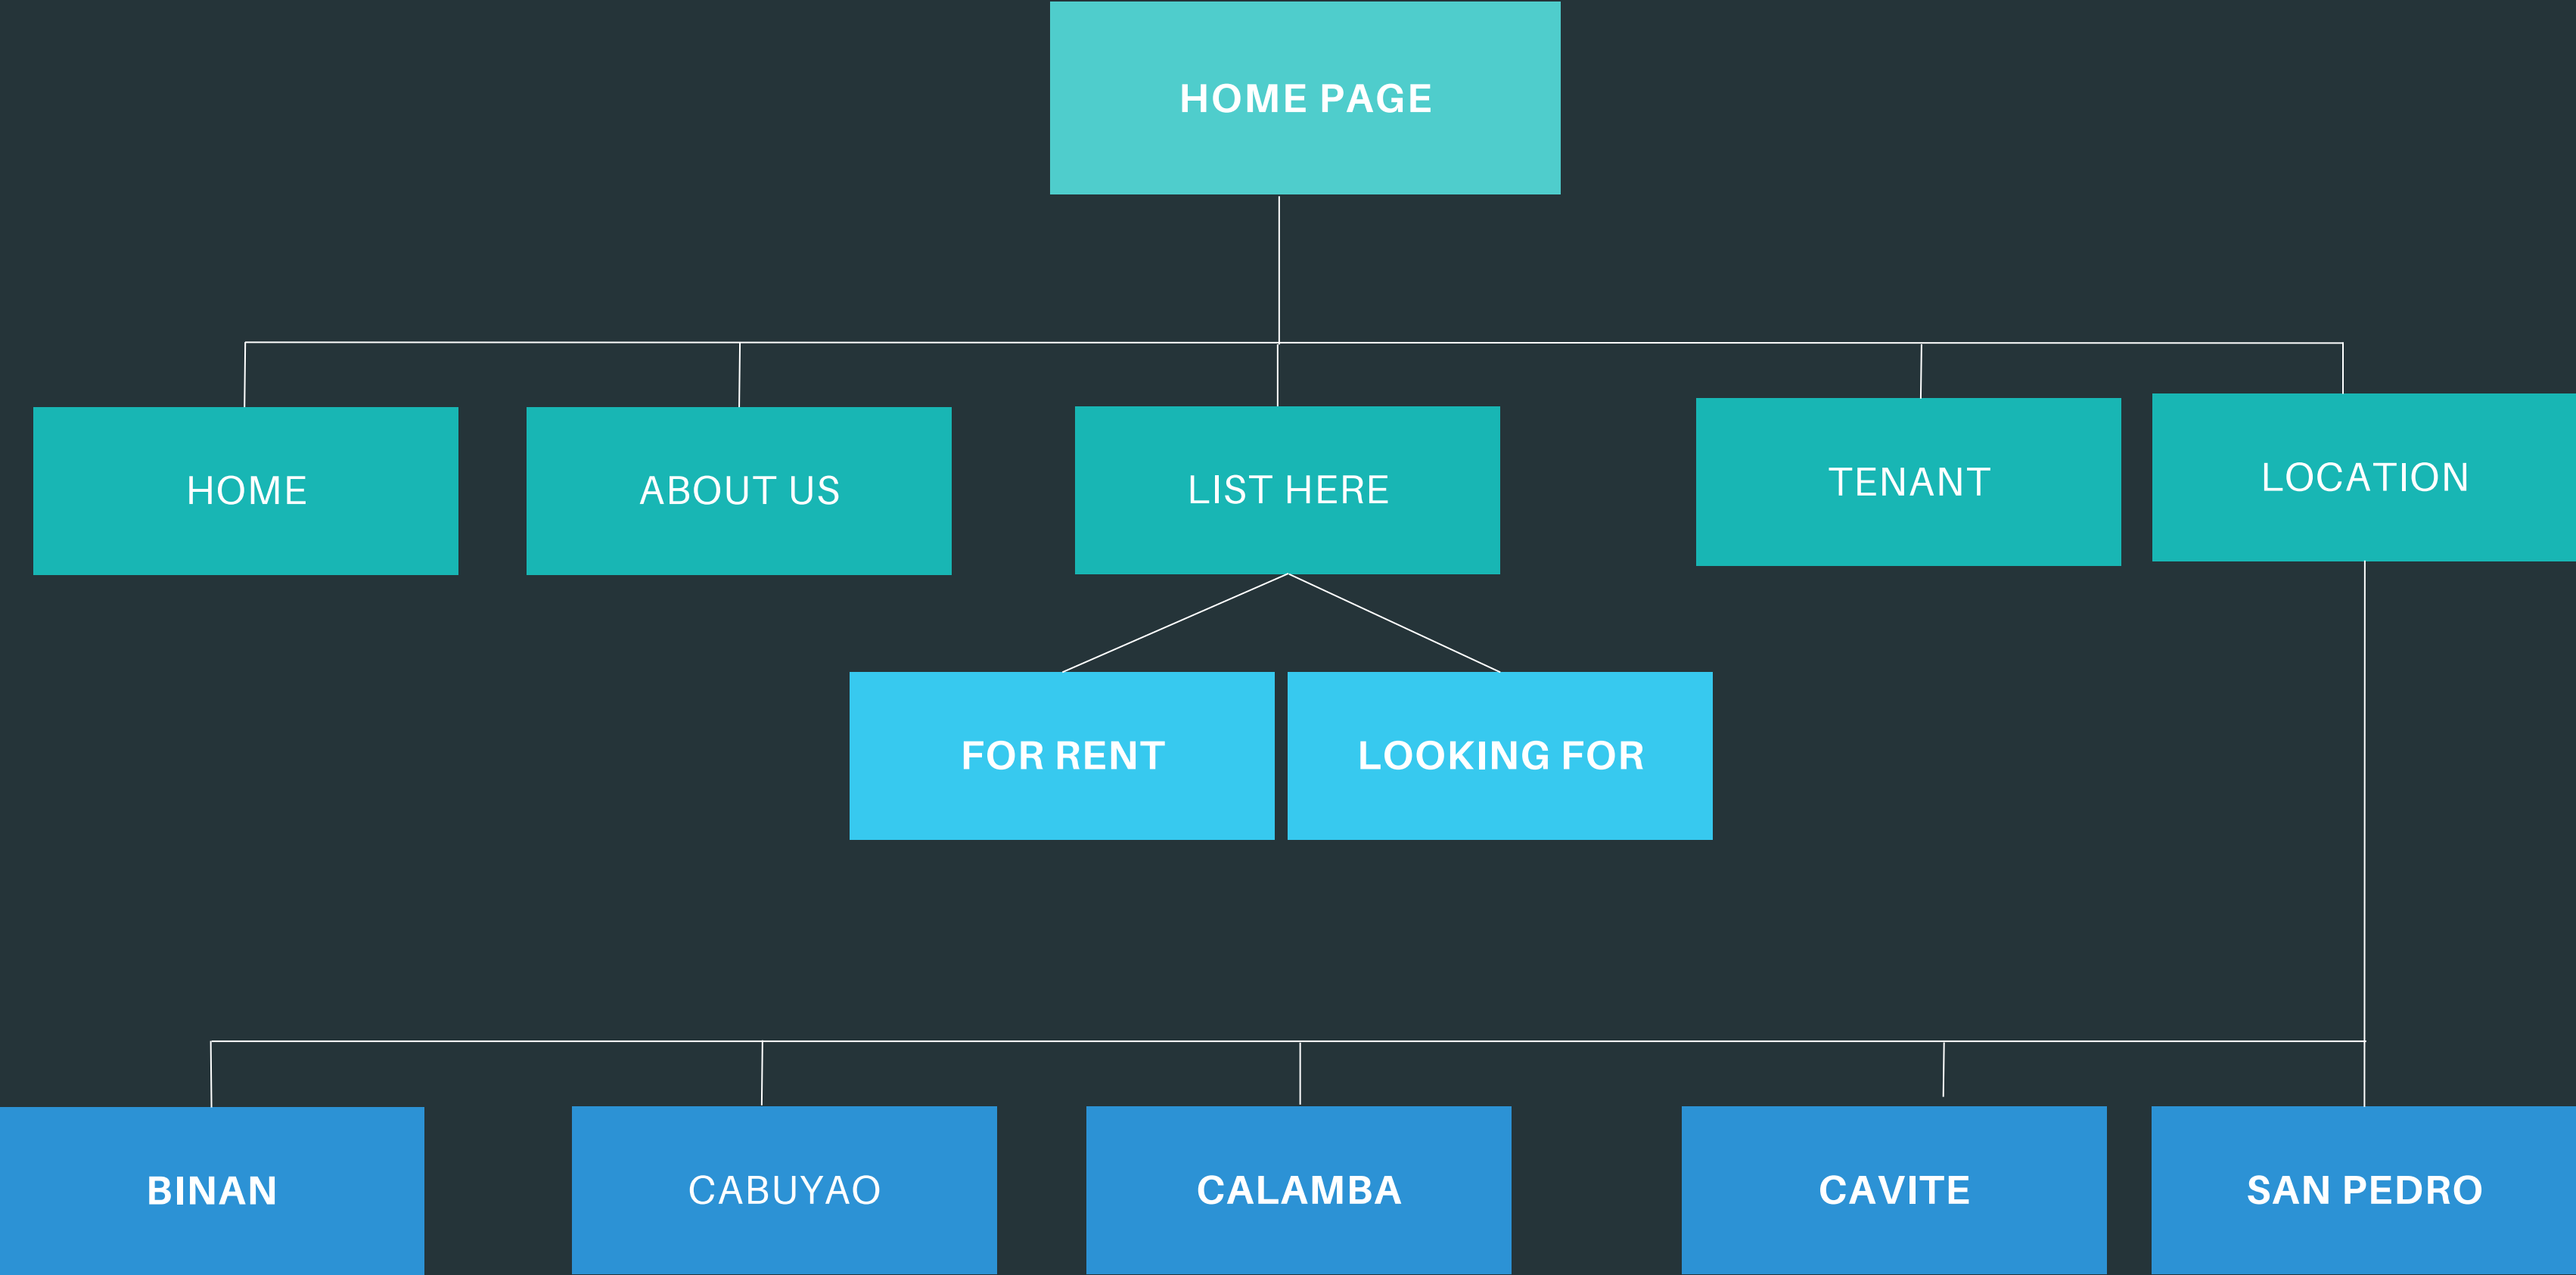

RENTEE

OWNERS

SITEMAP
